

## **Business to Business (B2B) " >**

Sandoz is committed to pioneering novel approaches to help people around the world access high-quality medicine. In line with this goal, Sandoz partners with select pharmaceutical companies to provide access to finished products and active ingredients manufactured across the global Novartis Technical Operations network.

Our customers have access to a broad portfolio of products and API's manufactured to Novartis standards from an extensive range of therapeutic areas and drug delivery mechanisms.

In addition to high-quality finished products and raw materials, partners are offered operational and technical support to achieve a reliable and easily integrated supply service.

If you would like to discuss partnering opportunities, you can get in touch with us at various industry events.
